EDUCATION

Centennial College

Ontario Advanced Diploma in AI, Software Engineering Technology

Toronto, ON

Aug 2024 – Dec 2027

EXPERIENCE

AI Training Contractor

Mercor

May 2026 – June 2026

Remote (San Francisco, CA)

- Evaluated and ranked LLM outputs across coding and consulting tasks using structured rubrics, comparing model responses side by side and providing written rationale for each ranking to improve model alignment
- Identified hallucinations, factual inaccuracies, and safety issues in model-generated responses, documenting failure patterns and providing detailed feedback to support model improvement for leading AI labs

Software Consultant Intern

KPMG

Jan 2026 – Apr 2026

Toronto, ON

- Developed Python automation scripts using NumPy and scikit-learn, cutting recurring manual data processing from 10 hours to near-zero for 90+ consultants
- Built an RFP (Request for Proposal) document generator using Power Automate, automating the assembly of proposal documents from structured inputs and reducing manual drafting time for the advisory team
- Built and maintained Oracle SQL stored procedures for an internal pricing tool, enabling 30+ consultants to query and evaluate deal profitability directly from the database
- Created Power BI dashboards connected to SQL data sources covering 5 years of advisory deals to surface workflow trends and data insights for internal stakeholders

Marketing Associate

Quartermaster

Apr 2025 – Dec 2025

Toronto, ON

- Collaborated with the software team to triage and report product bugs via Jira and Slack; supported a team of 11, helped drive a 15% homeowner-to-user conversion across the GTA

PROJECTS

Multi-Agent Product Copywriting | Python, TypeScript, LangChain, Docker, Git

Jan 2026 – Present

- Designed a multi-agent Python backend workflow handling product analysis, SEO strategy, competitor research, and copywriting, producing marketplace-ready content in under 30 seconds
- Containerized a scalable multi-service architecture with Docker Compose and automated builds, tests, and PR checks via a GitHub Actions CI/CD pipeline

Supply Chain Transparency & Audit Platform | C# .NET 8, React, SQL, Redis, Docker

Jan 2026 – Present

- Built a supply chain compliance platform that traces ethical and regulatory compliance across multi-tier supplier networks using a graph-based relational model with recursive SQL CTEs
- Designed with Clean Architecture (Domain/Application/Infrastructure/API), JWT auth, Redis caching, and containerized via Docker/Kubernetes with CI/CD through GitHub Actions

Cosmetics Multi-Agent RAG System | LangChain, LangGraph, FAISS, Streamlit

Sep 2025 – Dec 2025

- Built a multi-agent backend system (Planner, Reflection, Summarization, Validation) backed by a retrieval pipeline over open-source health product data, with Flask API serving and Streamlit chat UI
- Used LLaMA 3.3 via Groq for inference and FAISS as the vector database for semantic retrieval

YouTube Comments Spam Detector | scikit-learn, NLTK, Python

Sep 2025 – Oct 2025

- Built a spam/ham classifier in scikit-learn and NLTK using a Multinomial Naive Bayes model with Bag-of-Words features and TF-IDF weighting, reaching 87% test accuracy

TECHNICAL SKILLS

Languages: Java, Python, C#, JavaScript, TypeScript, C++, SQL, PL/SQL, NoSQL, HTML/CSS, Bash

Frameworks: Node.js, Express, Flask, REST APIs, MERN, React, Next.js, TailwindCSS, Bootstrap, Streamlit, Cypress

Developer Tools: AWS, Azure, Docker, PostgreSQL, GitHub, Apache Airflow, Kubernetes, Redis, ROS2, Snowflake

Practices: Agile, SDLC, CI/CD, DevOps, MLOps, Systems Design, Unit Testing

AI & ML: RAG, MCP, scikit-learn, TensorFlow, PyTorch, NLTK, NumPy, LangChain, LangGraph, ChromaDB, FAISS
